SanoTech 360 Announces Addition of EMist

FORT WORTH, Texas--SanoTech 360, LLC, a leading provider of innovative, clinically-proven products and services, today announced that it has finalized an agreement to purchase the assets of EMist.

This strategic move is a natural development for SanoTech, explained George Robertson, CEO. "This new addition to the SanoTech portfolio will allow us to capitalize on the tremendous opportunities in this market. For example, in the education vertical alone, when students are absent due to illness, it not only means they're missing essential learning opportunities, but a school district loses vital funding as well. Estimates show that schools lose approximately \$40 per day in funding for every absent student. Using conservative projections, a 100,000-student school district would lose \$200,000 a day to a flu outbreak that affects a mere 5% of the student population. The company's flagship product, the EMist EM360, ensures that exposed surfaces can be frequently and comprehensively disinfected to reduce absenteeism due to illness."

Adding EMist beneath the SanoTech umbrella blends together the strengths of two experienced companies with the vision of helping people live longer, healthier lives by providing solutions in the fight against the unnecessary spread of sickness and infection within communities across the country.

SanoTech 360 will continue to provide exceptional and lifesaving infection prevention measures through their proprietary EM360 Electrostatic Disinfectant Application System. Josh Robertson, President, said, "Job number one for healthcare cleaning professionals is infection prevention. This year alone it's estimated that 1.7 million people will contract a totally preventable healthcare-associated infection (HAI) that will add nearly \$20 billion to healthcare costs. The EM360 Electrostatic Disinfectant Application System is superior to traditional spray and wipe methods because the technology provides a no-touch application to environmental surfaces that can eliminate cross-contamination and help render surfaces hygienically clean, for a more effective and efficient outcome against HAIs. EMist lowers environmental bio burden, improves outcomes and decreases the bottom line."

SanoTech is committed to creating safer, healthier environments by delivering innovative, clinically-proven products, services, and training for life to facilities including education, healthcare, and office environments.
